It's not just metal with holes.

We convert commodities into components.

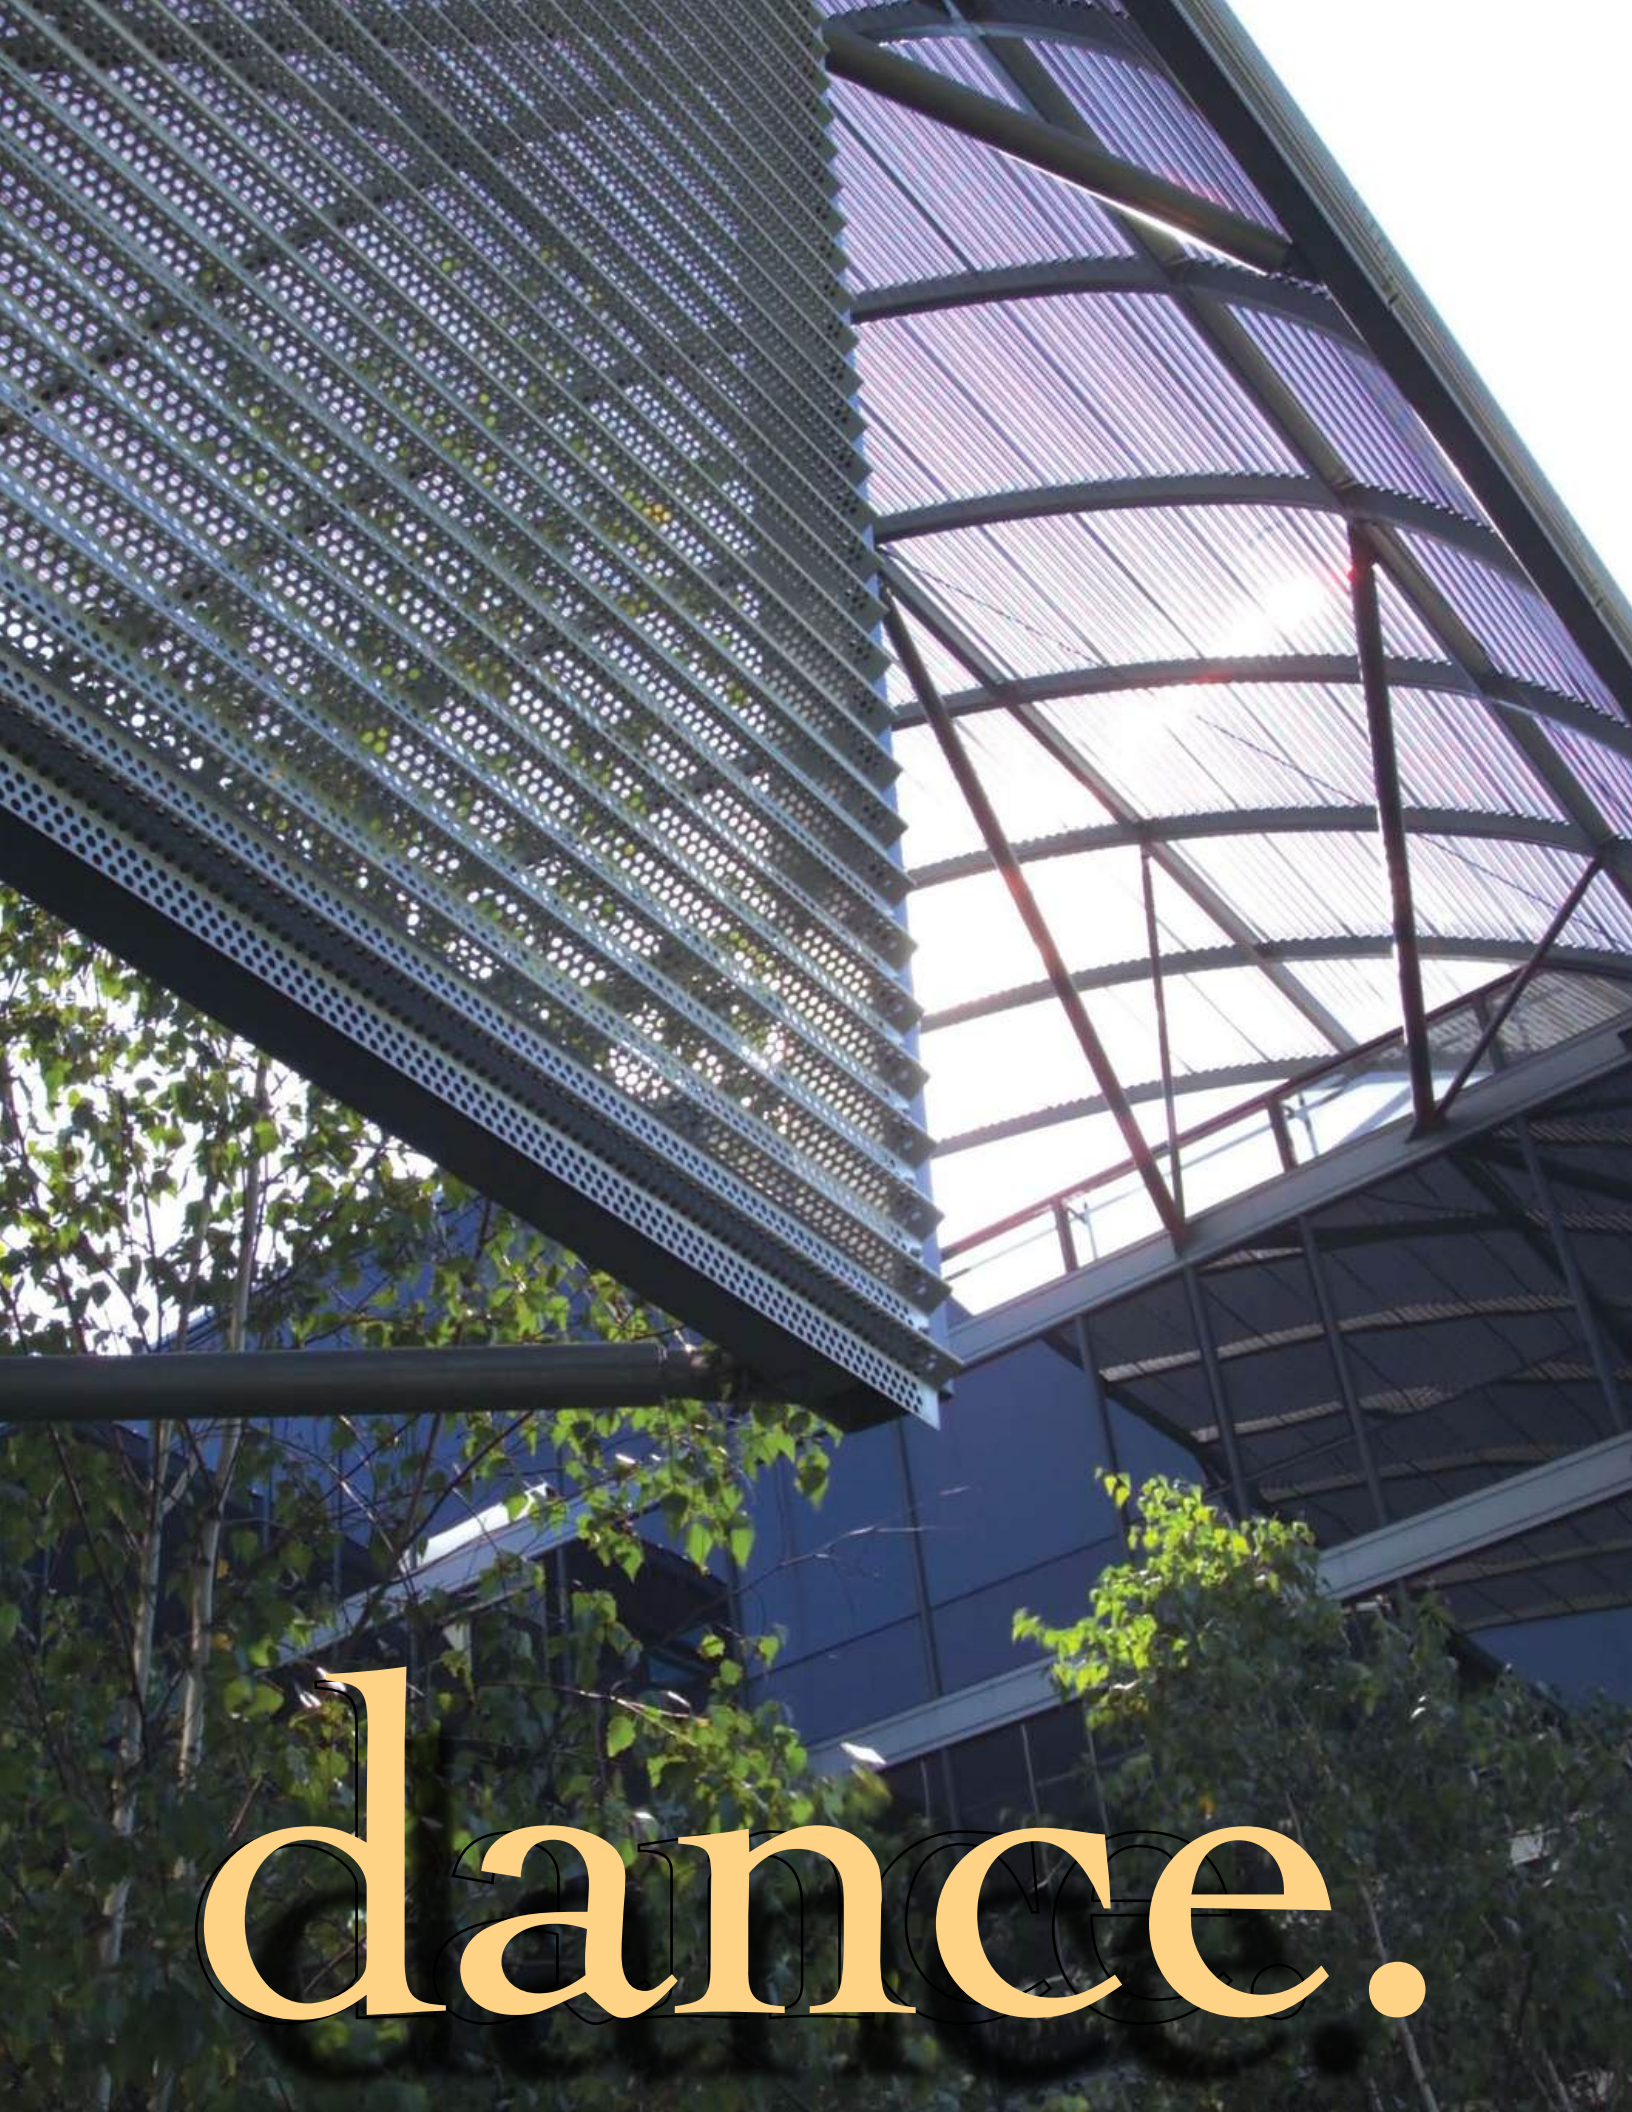

We design, produce, and fabricate to the most precise specifications for the most demanding customers. today, our speaker grilles shape sound to the delight of audiences around the world. our filtration screens make environments more friendly. our agricultural components help create food for everyone. our architectural components bring magic to the spaces we all inhabit.

We create visual interest.

architectural grilles. decorative panels.
display components. our grilles, screens, and architectural components help designers enrich environments with light and shadow.

We teach light to

dance.

We shape sound.

our close collaboration with audio engineers helps manage their clients' acoustics. We help fabricate ceiling panels that silence ambient noise. in industries from medical to semi-conductor manufacturing our acoustical panels help make sound environments more comfortable.

We teach sound to

resonate

our agricultural screens and strainers

help prepare crops for market. We make elements for filters that clean particles from the air we all breathe and water we drink. We even provide components for security systems, to keep bad guys out of good places.

We teach the littlest things to

behave.

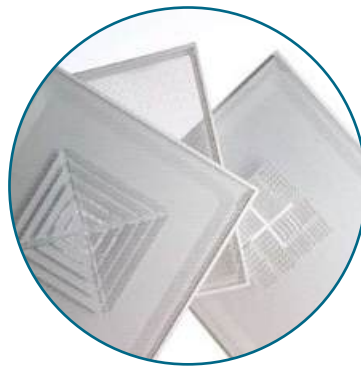

Some of the industries in which we've made our reputation:

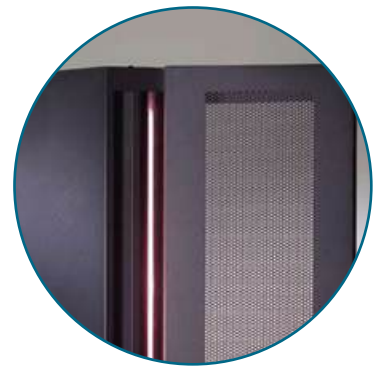

AUDIo custom speaker grilles require high open area patterns. We work in partnership with audio engineers to create designs that meet exacting criteria, are durable in many demanding outdoor applications and are pleasing to the eye.

ArCHITeCTUrAL designers bring their ideas for building and parking structure facades to us. they design outdoor furniture and components that bring beauty to all kinds of spaces. We execute their designs in many materials, including thick aluminum and steel.

HVAC We make commercial air diffusers, fan guards, and screens. products to make air cleaner and people more comfortable everywhere.

eLeCTronIC enCLoSUREs For server cabinets and many other types of applications, the patterns are unique, and built to exacting specifications and flatness. they provide shielding from electronic interference, and sufficient cooling for demanding components.

DeSIgn – TooLIing – PerForATIing – FABrICATIing – SToCKIng

We can perforate metal and other materials up to ½” thick, and up to 72” wide in sheet or coil. We can provide additional fabricating upon finishing, including part holes, notching, forming, corrugating, and more, to give you a complete component solution. difficult projects are our engineering staff's bread and butter. We work with autocad files via e-mail to make it easier to share ideas. We also provide stocking for many customers who require us to keep many truckloads of perforated components ready at all times. Finished products can be delivered in sheets, coils, and re-squared blanks. We work to be your partner, whether you simply need perforated stock, or need us to be an integral part of your production flow.

photo taken of industrial noise control, inc.®

noISe ConTrol

We make specialized panels and components for mufflers engineered to exacting tolerances, which are used to control unwanted sound in public, professional, and technological spaces.

STore FIXTUreS AnD DISPLAyS

our perforated metal is used in shelving and display racks at places everyone visits every day. home depot®, sears, target, and Blockbuster video are just a few of the retail outlets where our products are used.

PerForATeD bAKIng TrAyS

much of north america's bread is baked in pans made from our perforated blanks.

FILTrATIOn

our perforated metal is used for wrappers and baskets in many kinds of oil, air, and water filters.

Our Capabilities.

For more than sixty years,

and the finest, most experienced, most exacting craftsmen. it's been about building our business through superior service, through the loyalty of our customers, and when the opportunity presents itself, through careful acquisition. to become the very, very best at what we do.

it's been about the latest, best equipment,

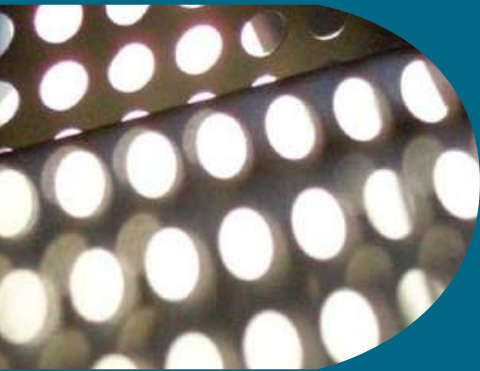

and the finest, most experienced, most exacting craftsmen. it's been about building our business through superior service, through the loyalty of our customers, and when the opportunity presents itself, through careful acquisition. to become the very, very best at what we do.

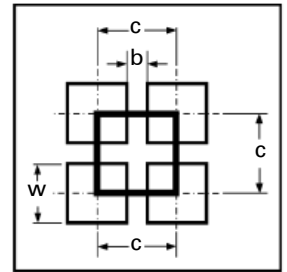

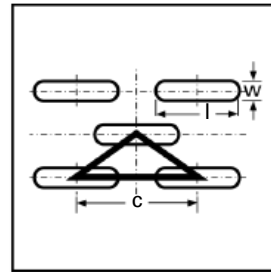

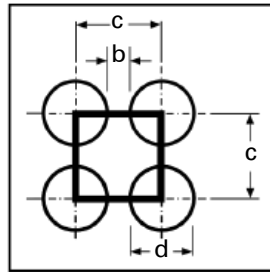

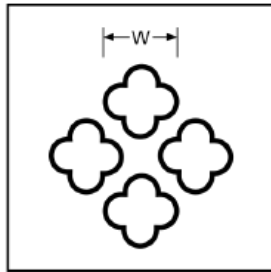

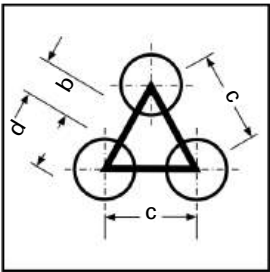

Our History.

We have a single minded commitment

to our craft. our core business, what we live and breathe, is perforating. this is what we do, and it is all we do. the equipment we acquire, the partnerships and alliances we make, the focus of our people are all dedicated to offering superior products and services in our chosen field.

Our Dedication.

round Holes Staggered

shape: round
 pattern: staggered
 hole size: d
 center distance: c
 Bridge size: b
 range of hole size:
 .045" - 4.0"

ornamental Holes

shape: cloverleaf
 pattern: staggered
 hole size: w
 patterns available:
 chainlink, cloverleaf,
